REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: in combination with all the limitations disclosed in the base claims, in light of the specifications and in consideration of the appeal conference discussion, the prior art fails to disclose that it would not have been obvious to make a switch reluctance machine with a stator being circumferentially-spaced and segmented with winding wire precisely wound around individual one of the stator segment core to provide uniform inductance and resistance characteristics with a slot fill greater than 65% and using a sensorless drive circuit that derives the rotor position based on parameters that vary with the inductance and resistance of the stator segment assemblies and energizing the winding wire around the stator segment assemblies to control the operation of the switched reluctance machine based on the derived position of the rotor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio C. Gonzalez whose telephone number is 571-272-2024. The examiner can normally be reached on M-F (8AM-5PM).
